Experienced Software Developer with a passion for crafting robust and scalable solutions. Proven track record in designing and implementing high-performance applications. Adept at utilizing cuttingedge technologies to drive innovation and enhance user experiences. With a strong foundation in IT and a commitment to staying ahead in a dynamic industry, I thrive on tackling complex challenges and delivering optimal solutions. Let's connect and explore how my expertise can contribute to your next project or team. I recently obtained Google's IT Support Specialist Certificate, an 8-month course covering troubleshooting, customer service, networks, operating systems, and system management and security, including hands-on labs.

Relevant Work Experience

Fullstack Developer | Miami, Florida | Catholic Legal Services | May 2024 – Current

- Fullstack Developer using Angular CLI for the frontend and C# for the backend API. Building extra features to help the CCLSMIAMI workflow outside our mainstream software LSMP.

IT Support Specialist | Miami, Florida | Catholic Legal Services | January 2024 – May 2024

- LSMP (Legal Services Management Pro) development, a management system for CCLS Miami using VB .NET/Azure Cloud Services/SQL/JS/HTML/CSS.

- Development of a web application and management console tools for the Labre Program, a useful tool that allows low-income people to register and receive help. Facilitating the management of the participants shelters. I used vanilla JS for the frontend application and Visual basic for the backend.

- Development of an API that connects with the USCIS API to allow our clients and staff the Case Status consultation inside our main program (pending approval for the USCIS development team). I used Angular for the frontend and C# for the backend.
